Summary

As a passionate business professional, I possess a highly focused, analytical, and problem-solving mindset. I am eager to bring creative solutions and am dedicated to contributing unique perspectives that will elevate the overall goals of the organization.

Experience

Plaksha University

Assistant Manager

January 2026 - Present (4 months)

Mohali district, India

ExperGo Technologies Private Limited

Product Manager

January 2025 - January 2026 (1 year 1 month)

Gurugram, Haryana, India

Business Impact: Led initiatives that resulted in improved operational efficiency, cost savings, and revenue growth by leveraging data insights for decision-making.

Stakeholder Collaboration: Partnered with cross-functional teams, including product, marketing, and operations, to translate business requirements into data-driven solutions.

YORK AGROTECH PRIV LIMITED

Business Analyst

January 2024 - January 2025 (1 year 1 month)

Remote

Managed day-to-day operations, including inventory management, supply chain coordination, and production planning. Developed strategies that reduced waste by 10%-20%

Enhanced supplier coordination to improve product quality, surpassing competitors' standards while optimizing costs.

Collegedunia

Data Analyst

July 2023 - January 2024 (7 months)

Remote

Utilized Python for scripting and developed functionalities for web scraping using libraries such as BeautifulSoup and Selenium, as well as Optical Character Recognition (OCR) using EasyOCR. These efforts focused on extracting and processing diverse datasets from multiple sources to streamline data collection and input. Additionally, conducted comprehensive Exploratory Data Analysis (EDA) by applying statistical techniques and leveraging visualization tools to uncover key features, derive valuable insights, and establish a strong foundation for model development.

Propelld

Software Developer

January 2023 - July 2023 (7 months)

Bengaluru, Karnataka, India

Developed a back-end template to streamline development cycles, enhancing efficiency and reducing time consumption for developers. Integrated and optimized the FOIR calculation API for assessing loan applicants, ensuring alignment with new criteria. Additionally, created multiple APIs for CRUD operations on MongoDB and MySQL databases. Implemented NGINX log rotation using a Bash script to manage log file accumulation effectively on EC2 storage.

Education

Thapar University

Bachelor of Engineering - BE, Electronics and Computer

Engineering · (2019 - 2023)
